Subject: Geologic Sequestration of CO2 - Expert Elicitation Research Study
[Recruiting text - EPA.docx](#)

Dear Brody,

I received your contact information from Ken Johnson as a good person to discuss the Class VI permit application review process and timelines with, as you are the lead reviewer for the Hackberry project application.

I am reaching out to invite you to participate in my research study: Expert elicitations for assessing the hurdles, timing, and policy strategies for carbon sequestration in a blue hydrogen hub. The purpose of this study is to estimate the uncertainty in the amount of time it might take to develop and implement a facility for deep geologic sequestration of carbon dioxide in the Southwest PA region in connection with a hypothetical blue hydrogen hub.

Please see the attached document for more details, and reach out to me with any questions or comments, and let me know if you are willing to participate!

Thank you,
Emmy
